

Daily life is more effortless when you wear Evolv AI

If you're going to wear hearing aids all day long to help you stay active and engaged, why not have them make other aspects of your life effortless as well?

At Starkey, it was that kind of thinking that led them to design the world's first **multipurpose hearing aid**, and earn a **TIME Magazine Best Invention award** just a few years ago. Then, they took that technology and made it even smarter.

Evolv AI hearing aids improve on that award-winning invention, providing an array of **Healthable and Intelligent Assistant** benefits in a single device. You won't need any other devices to sync to your smartphone. Using Starkey's newly updated **Thrive Hearing Control** App, **Evolv AI** devices let you:

- Measure your daily activity much like a Fitbit
- Set up and track engagement goals which are important for good cognitive health
- Detect falls and automatically send alerts to select loved ones
- Translate languages in real time straight to your hearing aids
- Schedule reminders to take medications or do other tasks
- Find your hearing aids (or smartphones) if they're lost or misplaced
- And much, much more!

But the best part of EVOLV AI's is how much clearer you'll hear!

Evolv AI makes connecting effortless, too!

The whole reason we want to hear our best is to stay connected — to our friends and loved ones, to the activities we enjoy most, and to the information we need — either in person or via our smartphones and TV. **Evolv AI** makes that effortless, too.

Evolv AI's superior sound quality helps you hear and understand the best you can while connectivity enhancements make it crisp and clear to listen through your iPhone or Android. Making phone calls, watching videos, listening to music and podcasts, or staying in touch via video chat haven't sounded this good in a long time!

Is it time for you to Evolv?

If you've been putting off getting hearing aids or holding off on upgrading the current hearing aids you wear, now is the time to **Evolv**. You'll be able to find the style that is most comfortable for you because the **Evolv** comes in eight different models. The **Evolv** is NOT your grandfather's hearing aid. It's literally a smart device that fits comfortably in your ear, makes everything clearer and is fun to wear.

To try **Evolv AI** hearing aids for yourself, call **(916) 407-1723** to schedule your **Free EDUCATIONAL Hearing Test and Consultation**, **PLUS a LISTENING DEMONSTRATION** during our **EVOLV Listening Event**. Hear it for yourself!

Come in before February 10, 2022, and **you'll receive a \$400 GIFT CERTIFICATE** towards the purchase of a pair of **EVOLV AI** hearing instruments! But call now as appointments are limited.
